For/in :- (objects)

loops through the properties of an object.

for (key in object) {

1) code block to be executed!

}

For/of :- (arrays, string, map)

While loop:

"My son was disturbing me while I was drilling"

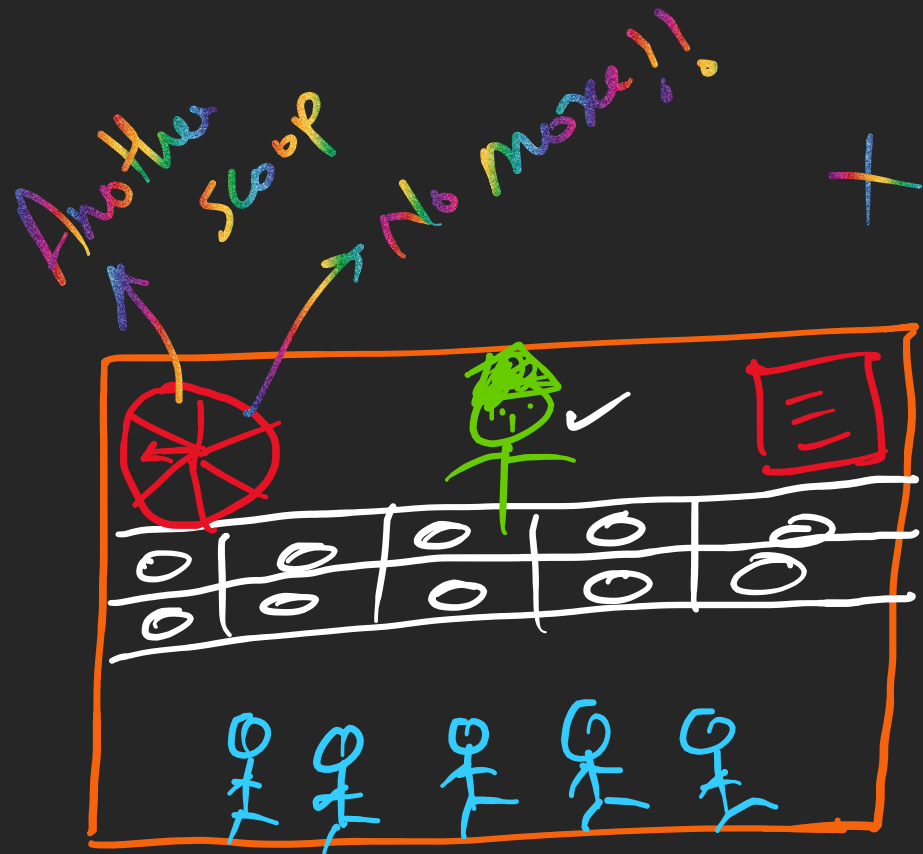

press (Music & light)

while (condition) {

// Code block to be executed

}

 "One Scoop of Ice Cream"

while: "Spinning wheel"

- * You always do the action once (like getting the 1st scoop)
- * After that, you check a condition. If condition allows, you can repeat the action.
